ORIGINAL ARTICLES

EPIDEMIOLOGY, CLINICAL PRACTICE AND HEALTH

Optimal objective measurement of physical function
and its predictive capacity for mortality among
community-dwelling older women
J Luo et al. 715

Factors associated with life-space mobility restriction
in home-care older adults receiving home-visit
rehabilitation: A cross-sectional multi-center
study in Japan
Y Sugita et al. 722

Validation of self-reported articulatory oral motor
skill against objectively measured repetitive
articulatory rate in community-dwelling older
Japanese adults: The Otassha Study
M Iwasaki et al. 729

Frailty but not low muscle quality nor sarcopenia
is independently associated with mortality
among previously hospitalized older adults:
A prospective study
JP da Costa Pereira et al. 736

The clinical characteristics and molecular epidemiology
of methicillin-resistant *Staphylococcus aureus* (MRSA)
among very elderly people in Japan
F Mitsumoto-Kaseida et al. 744

BEHAVIORAL AND SOCIAL SCIENCES

The 5-factor modified frailty index is a novel predictive
marker of death from other diseases after curative
gastrectomy for gastric cancer
Y Maeda et al. 750

LETTERS TO THE EDITOR

CASE REPORT

Sepsis associated with sodium glucose co-transporter 2
inhibitor in an elderly patient with chronic
kidney disease
T Nagamine 757

RESEARCH STUDIES

Association between muscle weakness and cap-grasping
patterns when opening plastic bottles in
community-dwelling older adults
D Shiratsuchi et al. 758

Prevalence of aspiration pneumonitis not requiring
antibiotics among patients with aspiration pneumonia
A Goto, K Komiya and J-i Kadota 760

Barrier to sharing a dementia diagnosis with neighbors
in Tokyo
T Okamura et al. 761

A question about opening polyethylene terephthalate
bottle caps enables high-precision determination of
handgrip strength in older Japanese adults
Y Sawaya et al. 764

CORRECTION

Correction to "Prognostic effect of body mass index to
mortality in Korean older persons" 766
